### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 03 December 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Igarashi (5,668,930).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3,4,7 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Igarashi (5,669,930). Igarashi discloses a stent-graft wherein the graft being made from poly-para-xylylene or a derivative thereof and the wall thickness is range from .01 to 20 microns and the graft cover the inside and outside of a stent.

Note: The introductory statement of intended use and all other functional statements have been carefully considered but are deemed not to impose any structural limitations on the claims distinguishable over the Igarashi's device which is capable of being used as claimed if one desires to do so.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1,2,5,6,8-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Igarashi '930. Igarashi discloses all the limitations of the claims except fails to disclose the polyparaxylylene having formula as claimed. It would have been obvious matter of design choice since the applicants have not disclose that having the polyparaxylylene with that specific formula solves any stated problem for any particular purpose and it appears that the graft with that specific formula would perform equally well with the polyparaxylylene as disclose by Igarashi.

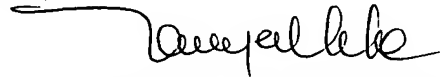

In addition, the polyparaxylylene with the formula as claimed are known in the art. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute a polyparaxylylene having a formula as claimed for the polyparaxylylene of the Igarashi reference. Doing so would amount to mere substitution of one material for another within the same art that would perform equally well in the Igarashi's stent-graft.
